

Spring 2 Home Learning

To be brought into school the week commencing Monday 23rd March

Home Learning Task

For this term's home learning, we would like to give you a task related to our topic about Ernest Shackleton and his adventure to the Antarctic.

Imagine you are going on a journey somewhere such as the Antarctic. What would you need to take with you?

Your chosen work can be either an actual survival kit that you make using real-life items or you can draw and label one. You could include rope, a first aid kit, a compass, some food and anything else you think a survival kit would need. Below are some ideas. Please make sure that if you are making the survival kit that nothing dangerous, such as knives or matches, are included.

What to do

You will have the chance to show it to your class and answer their questions.

Success Criteria

To make something that...

- Includes key items for survival.
- Includes labels if you draw it.
- You can tell your classmates about!
