Animals including humans

Key Knowledge Fact Sheet – Year 3

The **skeleton** is made up of bones.

It has 3 main jobs:

- **support**
- **protection**
- **movement**

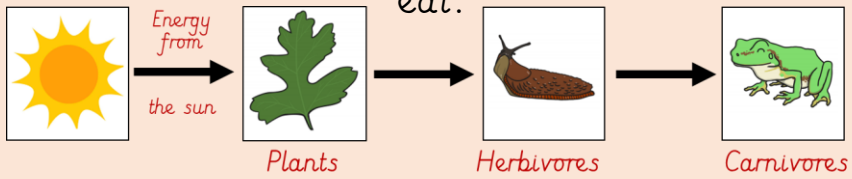

Some animals have skeletons too.

Animals cannot make their own food.

They must get their **nutrition** from what they eat.

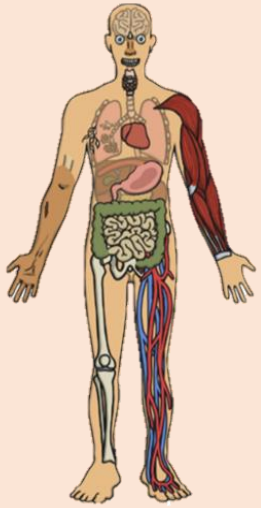

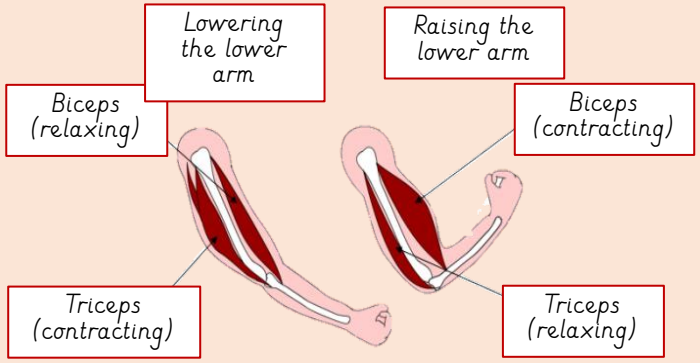

A **herbivore** only eats plants.

A **carnivore** only eats meat.

Humans are **omnivores** - they can eat both plants and animals.

Muscles help the body to move.

Muscles work in pairs to lift and relax the bones.

Animals need the right **types** and **amount** of **nutrition**.

Humans need a balanced diet of all the food groups.

Other animals need a different diet.
