Dear Parent/ Carer

National Child Measurement Programme (NCMP)

Height and weight checks for children in Reception and Year 6

What is the NCMP?

Each year in England, school children in Reception and Year 6 have their height and weight checked at school as part of the National Child Measurement Programme.

Height and weight measurements are used to calculate weight status.

Your child's class will take part in this year's programme.

The checks are carried out by registered school nurses or trained health care providers. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils.

The programme will be delivered in a COVID-safe way, in line with the school and local authority's safety control measures.

The information we collect and why we do

Date of measurement, sex and date of birth are used to calculate your child's weight category

Name, date of birth and NHS Number are collected to link your child's measurements between when taken in Reception and then again in Year 6.

Other data sets held by NHS Digital and Department of Health and Social Care may also be linked as this would let us add information from health and education records, where lawful to do so, to understand how and why the weight of children is changing, and how this affects children's health and education. Linking information in this way helps us to understand how and why the weight status of children is changing, and how this affects children's health. **All the data collected is also used for improving health, care and services through research and planning.**

Ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England

**All this information
is treated
confidentially and
held securely.**

Maintaining the wellbeing of children in the NCMP

The wellbeing of children and families is very important. Measurements are conducted in a sensitive way, in private and away from other children.

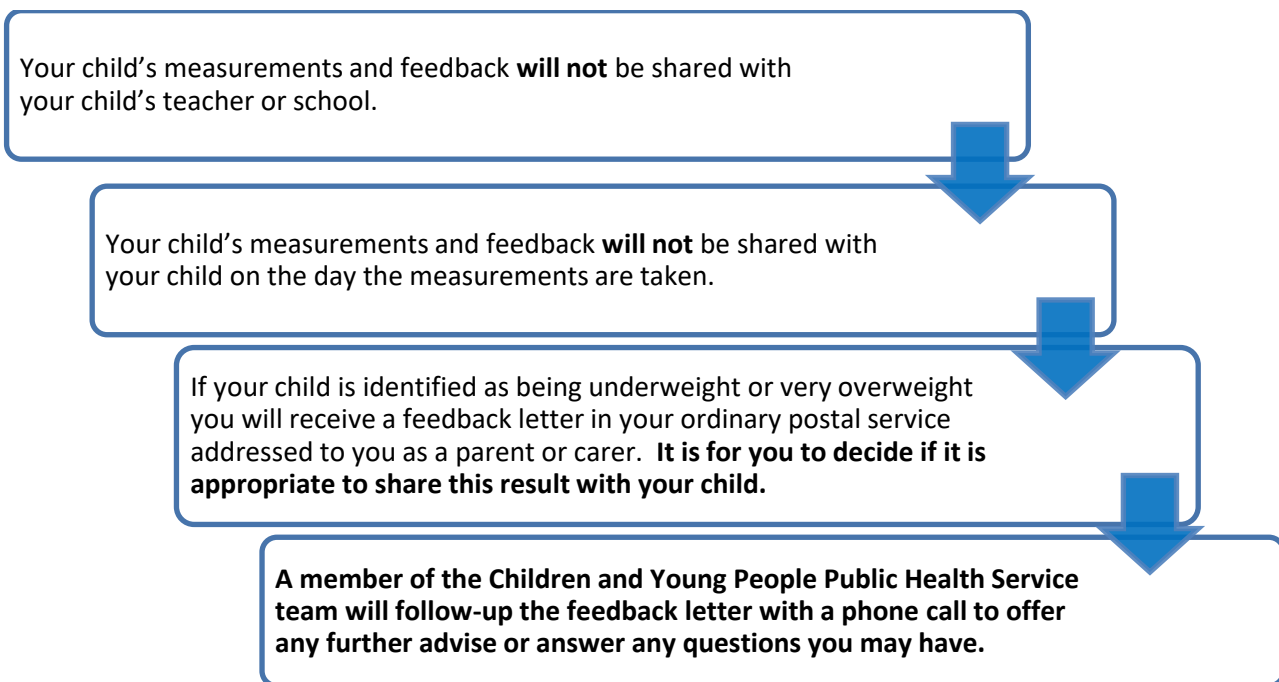

Feedback to some measurements is provided to parents and carers. There are no judgements made and it is recognised that children and young people are constantly changing, including their size and shape as they grow.

The emotional impact of the NCMP has been researched and studies show that there are no negative changes as a result of being measured or receiving feedback.

No individual measurements will be given to school staff or other children.

Managing active, healthy lifestyles can be tricky and weight can change due to many different lifestyle choices or individual circumstances. The feedback offered to parents and carers is the opportunity to have an informal chat to identify the possible reasons for their child's result, which is followed by best suited support and guidance to the child and family.

How you will receive feedback after your child is measured and where to find support

It is important to us that after the measurement, you have opportunity to discuss your child's result and find the right support for you and your child.

If you do not receive feedback but have any questions you wish to ask regarding your child's health, including lifestyle, please do contact your Children and Young People Public Health Service for support on the number at the top of this letter.

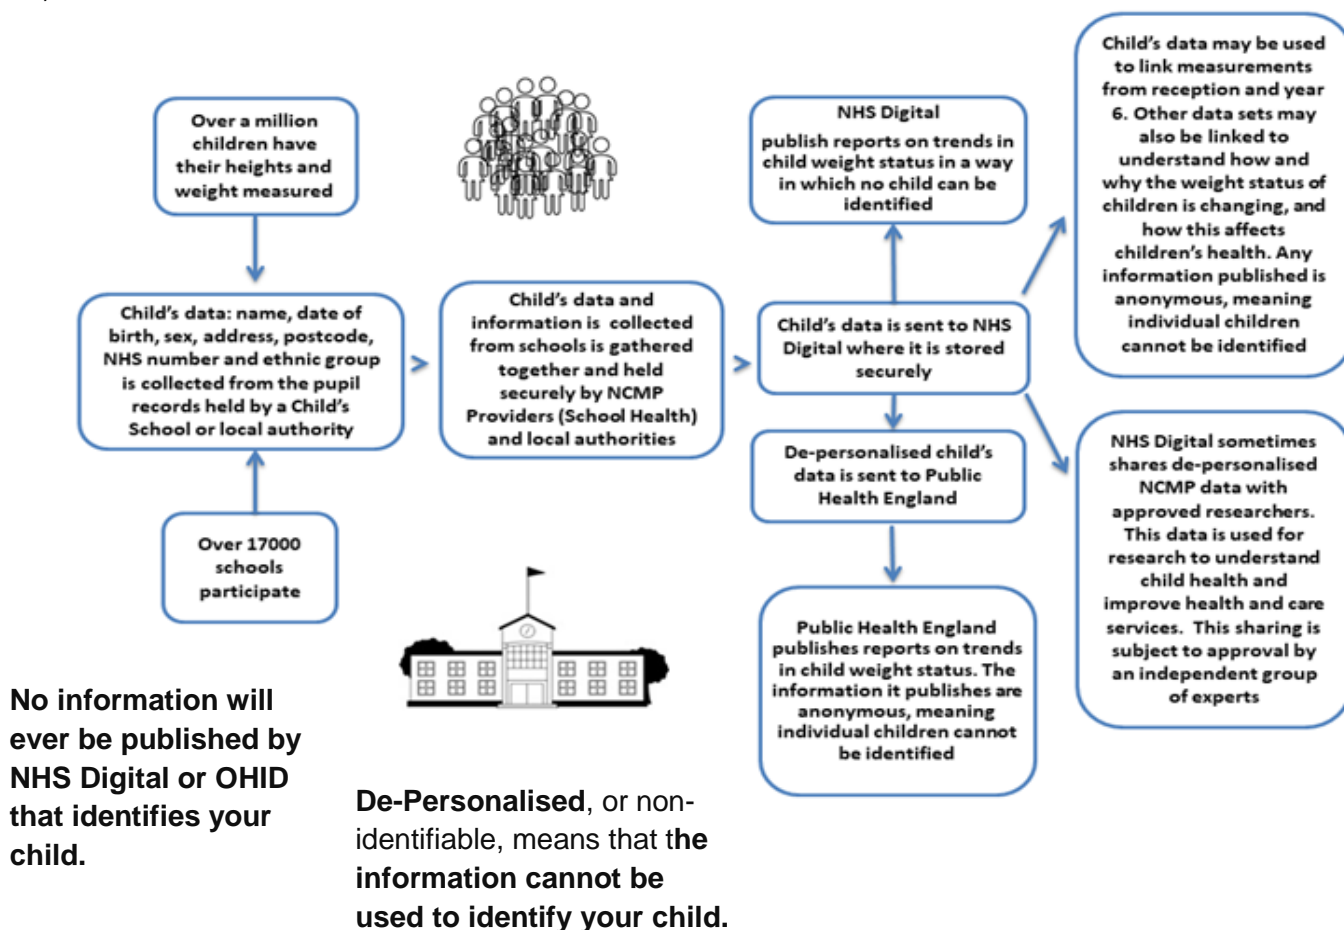

You are welcome to contact the Children and Young People Public Health Service or your family GP for support at any point if you are concerned about your child's weight, you do not have to wait for the measurements to be completed or to receive feedback from a measurement result.

How the data is used

The information collected from all schools in the area for the NCMP will be held securely, as part of local child health record, by our Children and Young People Public Health Service providers, Dorset HealthCare University NHS Foundation Trust (DHC).

NHS Digital is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

Office for Health Improvement and Disparities is responsible for working to protect and improve the nation's health.

Withdrawing your child from the National Child Measurement Programme

✓ If you are happy for your child to be measured, you do not need to do anything.

Please inform your child's school as soon as possible after reading this letter:

- if you do not want the height and weight of your child to be checked
- if your child has a medical condition that affects their height or weight or taking part in the measurements

Children will not be made to take part on the day if they do not want to.

The Children and Young People Public Health Service will also be working with schools in promoting healthy lifestyles, which may include additional activities for children and families. Look out at your school for any activities or signposting during term and holiday time.

Yours faithfully

Sam Crowe

**Director of Public Health for
Dorset Council and
Bournemouth, Christchurch & Poole Council**

Cathi Hadley

**Director of Children's Services
Bournemouth, Christchurch & Poole Council**
